

# Quick Coupling Valves

*Heavy-duty red brass and stainless steel construction with TuffTop™ spring-loaded covers*

HK Coupler Key

HQ Quick Couplers

HS Hose Swivel

**H**unter's HQ Quick-Coupling Valves are innovative, high-value products designed specifically for all projects that require quick water access while maintaining in-ground durability and vandal resistance. Our HQs are engineered for years of daily use and designed for maximum reliability. With heavy-duty red brass and stainless steel construction, all HQs feature our TuffTop™ spring-loaded locking or non-locking covers. The unique WingThing™ models feature anti-rotation

stabilizers for added vandal-resistance and operational durability. One-piece and two-piece models are available. The two-piece body design allows field maintenance of valve's upper seal without depressurizing the irrigation system. All locking cover models have purple TuffTop™ covers, making them suitable for use on reclaimed water projects. All models are configured for retro-compatibility with the popular brands installed over the years. HQ—the Hunter Tough quick-coupler product line.

## Features & Benefits

**100% interchangeable with Rain Bird®, Toro®, and Buckner®**

Protects your investment and simplifies ease of use

**Red brass and stainless steel construction**

Heavy-duty construction for long life and rugged performance

**TuffTop™ thermoplastic locking and non-locking covers**

Safety and durability over the years to come

**WingThing™ stabilization and Acme key connection**

Unique anti-rotation model also includes adjustable flow control

**Stainless steel lug on 1" and 1¼" keys**

Non-wearing lug offers easy engagement and smooth operation

**Spring Loaded covers with stainless steel springs**

Positive closing and protection for valve's sealing components

*Installing a quick coupler allows your site to have water wherever it's needed.*

*All locking models have purple TuffTop™ covers and are suitable for sites using reclaimed water.*
