

Polyethylene Drip Tubing

APPLICATIONS

- Irrigating ground cover, trees and shrub beds with on-line emission devices
- For use with point source drip emitters, micro-sprays or micro-sprinklers
- Assists in the positioning of on-line emission devices in difficult to reach places
- Provides flexible and durable header or transition to dripperline
- On-surface or subsurface installations

SPECIFICATIONS

- Conforms to ASAE standards for minimum wall thicknesses and diameters

Flexible formula for easy installation in any weather

FEATURES & BENEFITS

Compatible with most industry standard barb and compression fittings

Allows fast connections, speeds installation for easy layouts.

Available in stretch wrapped coils

Easy dispensing coils, without the tubing flaying.

UV resistant

Withstands degradation from heat, direct sunlight and harsh environments.

Manufactured under stringent quality controls

Assures highest quality, with every coil undergoing a battery of over 30 quality control checks.

Compact coils

For easy shipping, storage and packaging.

Produced from the finest low density polyethylene resin available

Available in black or white.
