Series AGD

Air Gap Drains for Use With 825Y, 825YD and 826YD Reduced Pressure Devices

AGD-Y: 3/4" - 2" (20mm - 50mm) / PN 905082**AGD-L: 2 1/2" - 10" (65mm - 250mm) / PN 905083**

Features

- Reduces amount of water splashing in area around reduced pressure assemblies.
- Funnels minor relief valve discharge into drain.
- Conforms to air gap installation requirements.

Operation

The FEBCO Air Gap Drain is designed to be installed under the 825Y 3/4" - 2" (20 - 50mm) and 825YD 2 1/2" - 10" (65 - 250mm) reduced pressure assemblies to catch minor relief valve discharge due to pressure fluctuations and/or minor check valve fouling.

NOTE: The gap drain is not designed to catch the maximum discharge possible from the relief valve. The installation of FEBCO air gap with the drain line terminating above a floor drain will handle any normal discharge or nuisance spitting through the relief valve. However, floor drain size may need to be designed to prevent water damage caused by a catastrophic failure condition. Do not reduce the size of the drain line from the air gap fitting.

Specifications

The air gap drain shall be corrosion resistant material with stainless steel mounting fasteners. The drain must be of a design that allows mounting by attachment of the drain to the relief valve of a reduced pressure assembly.

The air gap drain shall be FEBCO Series AGD or prior approved equal.

NOTE: Consult local codes to insure drain installation meets all requirements.
