## Valve Setter - Mechanical Joint by Flange Used with MasterSeries® N-Shape Assemblies

Sizes: 3" - 10" (80 - 250mm)

The FEBCO Series 611 mechanical joint by flange valve setter is constructed of fusion epoxy coated ductile iron. Valve setters are designed to augment the installation of the "N" series backflow prevention valves. Integral ductile iron support between elbows transfers thrust downstream, thus eliminating thrust block requirements between elbows. Mechanical joint restraint devices may be used at pipe connections, depending on local conditions.

### Features

- Corrosion resistant fusion epoxy coated.
- Eliminates the need for thrust blocks or other restraints at the point of installation.
- Flanges: ANSI B16.1 Class 125 (Standard)  
ANSI AWWA C153 A21.53-88

### Pressure – Temperature

Maximum Working Pressure: 175psi (12.1 bar)
