

LANDSCAPE & TURF DIVISION

OPERATION / PRESSURE INDICATOR STAKES

10-CV-01

For Use with Techline® CV Systems

Applications

- For Techline CV systems
- Any application where a very fine “fogging” effect is desired such as delicate plantings
- Add visual effects to the landscape or enhance the effect of outdoor lighting

Features/Benefits

- Provides quick visual confirmation of system operation
- Fogging nozzle emits a fine mist to indicate system operation and minimum required system pressure
- Creates a moistened area surrounding the fogger showing zone operation
- Answers the question “Is the system working?”

Specifications

- **Fogger:** Fogging rate less than 2.0 GPH, creates a moistened area approximately 2’ outward from nozzle
- **Check Valve:** Opens at 22 psi, closes at 10 psi

Ordering Information

- **Part Number:** 10-CV-01

10-CV-01 Operation/Pressure Indicator Stake

The set includes:

- Fogging nozzle
- Check valve
- Anchoring stake
- Tubing/adapter

Operation:

- At 14.7 psi line pressure, the Techline CV drippers open.
- At 22 psi line pressure, the Indicator Stake’s check valve opens and activates the fogging nozzle.
- The fogging nozzle has a maximum flow rate of 2.0 GPH @ 60 psi, and emits reduced amounts at lower pressures.

10-F-01

For Use with Techline® Systems

Applications

- For Techline systems

Features/Benefits

- Provides quick visual confirmation of system operation
- Flag rises to indicate system operation and minimum 10 psi system operation
- Answers the question “Is the system working?”

Specifications

- **Flag position:** Down (closed) position = 4.5 psi or lower
Halfway (45°) position = 7 psi
Upright (90° or open) position = 10 psi or higher

Ordering Information

- **Part Number:** 10-F-01

10-F-01 Operation/Pressure Indicator Stake

The set includes:

- Indicator flag
- Anchoring stake
- Tubing/adapter

Operation:

- When the zone is on, pressure causes the flag to rise
- At 10 psi and higher, the flag is at a 90° angle
- At 7 psi, the flag is at a 45° angle
- When the pressure drops below 4.5 psi or the system is off, the flag is in a down position
