

Packaged de-icing technology from EnviroTech

People Helping People Improve Their Environment

MeltDown Absolute Zero™ is an environmentally-friendly de-icing product used to clear snow and ice from walkways, driveways, parking lots, and roadways.

This 100% magnesium chloride hexahydrate is produced naturally, using a solar evaporation process, and is one of the highest quality, most cost effective, and eco-friendly de-icers in the world.

MeltDown Absolute Zero™

FROM ENVIROTECH

Performance

MeltDown Absolute Zero not only has a higher melting capacity and faster de-icing rate than other widely used products, it can perform at temperatures well below 0°F. The hygroscopic nature of this product allows it to quickly attract moisture and create a brine at below zero temperatures, making it a superior de-icing product.

Uses and Applications

MeltDown Absolute Zero is 100% magnesium chloride hexahydrate crystals. It can be used alone or blended with other de-icing materials to increase their usefulness. It is the most effective low temperature de-icer when reducing environmental impact and improving safety are your main concerns.

Features and Benefits:

- Reduces corrosion significantly
- Minimizes the amount of damage to concrete
- Lessens impact on vegetation
- Product works quickly to melt snow and ice

Testimonial

"This is the first season using Absolute Zero. It has exceeded our expectations. Cuts through the ice quick at all temperatures. Almost no damage to surrounding turf even after a heavy ice control season. Great product!"
